

Recommended Connection Configuration

Organization Name	Fairview Health Services	Date 4/18/2011
Preferred Method to send/receive files	Secure FTP (SFTP) VPN PGP encryption.	
What secures this connection?	All of the above methods are secure.	
Who to contact at our organization?	Netu Arjune – darjune1@fairview.org	
What do you need to do to use this method?	SFTP – secure ftp IP address or HTTPS address, username and password if applicable. VPN – IP address PGP encryption – pgp key.	
How long will it take to set up this connection?	3-4 weeks.	
Are there any special products I need to purchase and install to make this work?	Shouldn't be.	
Is this a Batch or Real-Time transaction? Please use Yes/No/NA to describe if you do not use the transaction	Batch	
File size limitations by transaction	No Limit.	
Recommended file naming conventions	Would like the file to have the X12 transaction as the file extension and .rpt for human readable reports.	
When can you start using this method?	As soon as customers are ready and we can have tested successfully.	
How many transaction files can you receive per day from a trading partner?	As many as they send.	
What are the hours you have someone available to cover transactions?	All of our processing is automated. We do provide 24/7 support and normal business hours for testing.	
Are file concatenations supported (e.g. can there be multiple batch submissions per file)?	No.
