

Recommended Connection Configuration

Organization Name	Allina Health System	Date 1/9/2003																								
Method to send/receive file?	Frame Relay																									
What secures this connection	Allina uses a combination of Cisco router access lists and Cisco PIX firewall rules to filter F/R traffic. Access is allowed at an IP address/port level.																									
Who to contact at our organization	Name: Brian Schoonover Phone: 612.775.1368 E-mail: Brian.Schoonover@Allina.com																									
What do you need to do to use this method?	A connection to the Qwest F/R cloud – which implies a CSU/DSU and router to terminate the connection.																									
How long will it take to set up this connection?	If both sides have a connection to Qwest's F/R cloud it should take 1-2 weeks. If a F/R circuit needs to be ordered it could take 4-6 weeks.																									
Are there any special products I need to purchase and install to make this work?	See above.																									
Is this a batch or Fast-Batch transaction?	<table border="1"> <thead> <tr> <th>Transaction</th> <th>Batch?</th> <th>Fast-Batch?</th> </tr> </thead> <tbody> <tr><td>835</td><td>Y</td><td>N</td></tr> <tr><td>837</td><td>Y</td><td>N</td></tr> <tr><td>270</td><td>N</td><td>Y</td></tr> <tr><td>271</td><td>N</td><td>Y</td></tr> <tr><td>276</td><td>Y</td><td>N</td></tr> <tr><td>277</td><td>Y</td><td>N</td></tr> <tr><td>278</td><td>N/A</td><td>N/A</td></tr> </tbody> </table>		Transaction	Batch?	Fast-Batch?	835	Y	N	837	Y	N	270	N	Y	271	N	Y	276	Y	N	277	Y	N	278	N/A	N/A
Transaction	Batch?	Fast-Batch?																								
835	Y	N																								
837	Y	N																								
270	N	Y																								
271	N	Y																								
276	Y	N																								
277	Y	N																								
278	N/A	N/A																								
Please use Yes/No/N-A to describe if you do not use the transaction																										
File size limitations by transaction	<table border="1"> <tbody> <tr><td>835</td><td>None</td></tr> <tr><td>837I</td><td>None</td></tr> <tr><td>837P</td><td>None</td></tr> <tr><td>270</td><td>None</td></tr> <tr><td>271</td><td>None</td></tr> <tr><td>276</td><td>N/A</td></tr> <tr><td>277</td><td>N/A</td></tr> <tr><td>278</td><td>N/A</td></tr> </tbody> </table>		835	None	837I	None	837P	None	270	None	271	None	276	N/A	277	N/A	278	N/A								
835	None																									
837I	None																									
837P	None																									
270	None																									
271	None																									
276	N/A																									
277	N/A																									
278	N/A																									
Please use N/A you do not use a transaction																										
Recommended file naming conventions	<transaction>-<connection type>-<Allina system>-<date> For example: 837-FTP-Medipac-01092003																									
When can you start using this method?	Immediately																									
How many transaction files can you receive per day from a trading partner?	Unlimited, with the understanding that F/R circuit contention and file size will cause varying levels of performance.																									
What are the hours you have someone available to cover transactions?	Regular business hours																									

Are file concatenations supported (e.g. can there be multiple batch submissions per file)	
Any thing else I should know?
